Proposition The homomorphism (3)

$$\mathcal{M}^{\sim}_{0,3} \longrightarrow \mathrm{Aut}(\widehat{\mathcal{G}}^{+})$$

is injective, and its image consists of the automorphisms$u$ of $\widehat{\mathcal{G}}^{+}$ which satisfy the following two conditions

Preceding material.

Proposition The homomorphism (3)

$$\mathcal{M}^{\sim}_{0,3} \longrightarrow \mathrm{Aut}(\widehat{\mathcal{G}}^{+})$$

is injective, and its image consists of the automorphisms$u^{\mathrm{i}1}$ of $\widehat{\mathcal{G}}^{+}$ which satisfy the following two conditions

Preceding material.
