Proposition The homomorphism (3)

$$\mathcal{M}_{0,3}^{\sim} \longrightarrow \mathrm{Aut}(\widehat{\mathcal{G}}^{+})$$

is injective, and its image consists of the automorphisms$u$ of $\widehat{\mathcal{G}^+}$ which satisfy the following two conditions

Preceding material.

Proposition The homomorphism (3)

$$\mathcal{M}_{0,3}^{\sim} \longrightarrow \mathrm{Aut}(\widehat{\mathcal{G}}^{+})$$

is injective, and its image consists of the automorphisms$u^{\mathrm{i}1}$ of $\widehat{\mathcal{G}^{+}}$ which satisfy the following two conditions

Preceding material.
